

The Cloud Based Platform
to digitalize
the healthcare journey

Powered by Microsoft Azure

Porini for Health, based on international data exchange standards, AI models and Microsoft technologies, enables efficient and collaborative management of data and resources to support staff and institutions in providing quality healthcare.

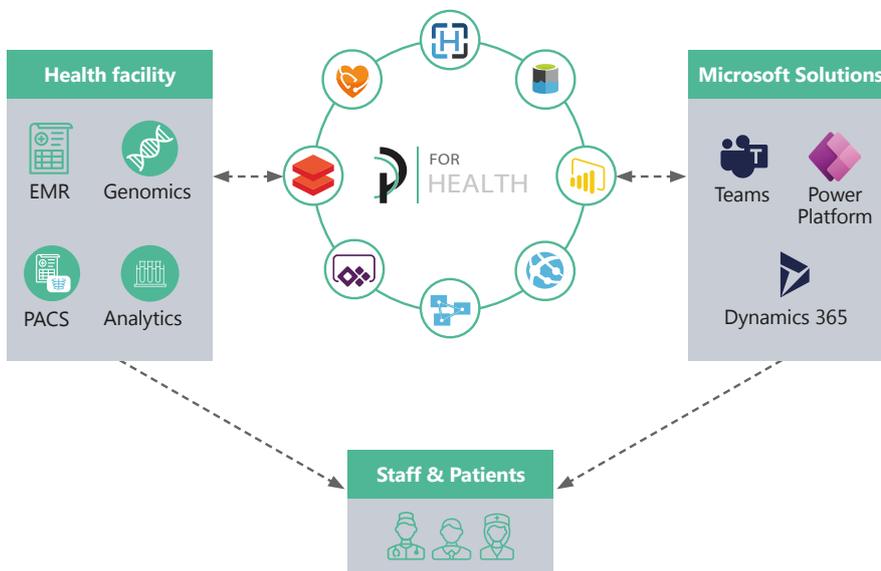

Porini offers a solution that meets several current challenges in healthcare, from limited patient information sharing to limited efficiency in resource management, through the support of integrated and collaborative technologies.

DESCRIPTION

PORINI FOR HEALTH provides an enabling infrastructure to bring the power of data standardization and intelligence to the world of clinical analytics.

Clinical Operational Efficiency relies on several data sources that shall be treated as a single body of information. The solution can "connect the dots" between a full range of products and platforms adding its own specific value to any kind of healthcare solution.

OVERALL ARCHITECTURE

FUNCTIONALITIES

- Integration Platform: Multiple data sources integration
- Data Analytics: Extract value from collected data
- Artificial Intelligence: A new age for healthcare data insights
- Business Applications: Leverage Microsoft health applications to provide value to patients
- Custom Modules: Extend the platform to suite any specific requirement

- Performance optimization
- Controlling and reporting

- Real-time information
- Integrated planning
- Rapid decision-making based on reliable data

- Fully integrated with Microsoft platform

THE CHALLENGE

Healthcare practitioners collect large amount of data related to patients. This data is often stored in different insulated systems or even collected in files hard to process electronically. This limits the value and the benefits related to collecting that data, making harder to spot patterns and potential threats to public health at their beginning.

OUR SOLUTION

Our solution enables informed management of data and resources and can reveal pathways to improve the quality of patient care, clinical data, diagnosis, and business management.

PORINI

With decades of experience (established 1968 in Como) and hundreds of projects implemented worldwide, Porini provides industry solutions and consultancy services dedicated to medium and enterprise organizations in Italy and abroad. Porini's excellence solutions are aimed at optimizing key business processes and are based on Microsoft Cloud Technology.
